-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim1-8, drawn to apparatus, classified in class 119 subclass 712
- II. Claim9-11, drawn to percussion, classified in class 43 subclass 84
- III. Claim12,13, drawn to SPONGE ACTIVATED, classified in class 521, subclass 50
- IV. Claim14, drawn to cutting devices, classified in class 119, subclass 721.
- V Claim15- 18, drawn to METHODS, classified in class 424, subclass 677
- VI. Claim19, drawn to Ph controller, classified in class 424, subclass 666
- VII***. Claim20,21, drawn to COYOTES, classified in class 424, subclass 84

The inventions are distinct, each from the other because of the following reasons.

Inventions I-IV,VI,VII and V are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case the method of subduing can use other products, such as coumarin lures

The various apparati & devices of groups I-IV ,VI,VII differ as being patentably distinct & independent inventions, as none require all features & elements of any other.

The Groups I –II have acquired a separate status in the art as shown by their different classification, have acquired a separate status in the art because of their recognized divergent subject matter, the search for any one group is not required for any other Group, and a search and examination of the entire application would place an undue burden on the Examiner, the present restriction requirement is proper for examination purposes.

Claims 1- 21 are generic to the following disclosed patentably distinct species: attractant ingredient. The species are independent or distinct because attractants to some are repellants to others.

Claims 1-21 are generic to the following disclosed patentably distinct species: subduing agent. The species are independent or distinct because each differs, physically, chemically & functionally from the others.

Claims 1-21 are generic to the following disclosed patentably distinct species: trigger. The species are independent or distinct because various trigger mechanisms can be used, each differing physically, chemically & functionally from the others.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims

subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Because the above restriction/election requirement is complex, a telephone call to applicant's agent to request an oral election was not made. See M.P.E.P. Sec, 812.01.
